

**JEETO**  
**BIOCOURIER**

*Committed To Care for & Carry Life*

# TEMPERATURE-CONTROLLED LOGISTICS FOR **LIFE SCIENCE & HEALTHCARE**

———— *Domestic & International* ————

## **SPECIALIZED SOLUTIONS :**

- Clinical Trial Logistics
- Medical Devices
- Cell and Gene Therapy (CGT)
- Blood and Cord Blood Logistics
- Pharmaceutical Distribution
- Organ and Tissue Logistics
- Dry Ice Shipments
- Live Animal Transportation
- IVF Sample Transportation

Providing the best transport and shipping  
Services. currently, we are available allover the world.

Life Science research labs, biotech startups, and Hospitals face significant challenges in transporting temperature-sensitive materials for clinical trials and life sciences R&D. Many lack awareness of the logistics complexities, such as proper packaging, documentation, customs clearance, and temperature control. Without reliable logistics, samples can be compromised delaying research and causing financial losses. Our team, composed of life science professionals with frontline logistics expertise, understands the critical importance of these shipments.

We offer specialized temperature-controlled logistics services tailored for medical and life sciences labs, ensuring the safe transport of biological samples, clinical trials, and other R&D Shipments.

## Industries We Cater To ...

Live Animal Husbandry

Hospitals/Doctors/Laboratories

Pharmaceutical Companies

R&D Labs – National & International

Lab Equipment And Instrument Manufacturer

Contract/ Clinical Research Organizations

## TEMPERATURE-CONTROLLED SHIPPING

LOGISTIC SOLUTIONS FOR MOVING YOUR MEDICAL & PHARMACEUTICAL SHIPMENTS IN A SECURE, TEMPERATURE-CONTROLLED ENVIRONMENT.

1

**CLASSIFICATION OF MATERIAL**

2

**PRECISE PACKAGING SOLUTION**

3

**EFFICIENT TRANSPORT ROUTE**

4

**INTACTED PRODUCT INTEGRITY**

5

**CUSTOM & REGULARITY COMPLIANCE**

## OUR SERVICES

### Cold Chain Logistics

Tailoring the booking procedure to each customer is very important to our airfreight crew. We work hard to identify the air freight option that best meets your requirements because of this.

### Export/Import of life science materials

As life sciences organizations grow and collaborate for R&D purposes, managing global supply chains becomes more complex. Companies must stay compliant with international trade and customs regulations for Import/export products like medical devices, chemicals, pharmaceuticals, biological materials, and finished drugs for purposes such as research and testing. Jeeto BioCourier help them prepares docs as per Airline rule and custom compliance process, it begins with tariff classification, which helps categorize these goods from a customs perspective, followed by customs valuation.

### Packaging Solutions

Biological materials are extremely sensitive to temperature changes. We offer various packaging solutions to maintain different temperature ranges for national and international deliveries using dry ice and temperature-controlled packaging. We ensure the highest standards of professional handling and air freight according to IATA guidelines.

### Custom clearance

The proficiency in handling customs clearance, preparing import/export documentation, and managing all legal paperwork required for smooth logistics operations, all at highly competitive market prices.

### Emergency Courier Service

Time-sensitive, vital deliveries are subject to no delays. We treat it with extreme seriousness. To prevent a disaster, all you need to do is give us a call for any emergency logistics.

### Customized project Handling

We excel in complex projects that require specialized care and expertise. With decades of experience, our team is highly adaptable and skilled. We understand each project is unique, and we handle them with precision, working closely with you and logistics experts to ensure timely delivery and completion.

## Achievements:

1. **Launched** our Website, tracking API & social media platform.
2. About 100 International and more than 5000 Domestic shipment done successfully.
